Applicant Initiated Interview Request Form

Application No.: 01/50,125 First Named Applicant: Andrew
Examiner: Eric B. Kins Art Unit: 2122 Status of Application: Pending

Tentative Participants:

(1) Richard Fontana (2) John B. Conklin
(3) _____ (4) _____

Proposed Date of Interview: 7/3/03 Proposed Time: 11 (AM/PM) Eastern

Type of Interview Requested:

(1) ☒ Telephonic (2) ☐ Personal (3) ☐ Video Conference

Exhibit To Be Shown or Demonstrated: ☐ YES ☒ NO

If yes, provide brief description: _____

Issues To Be Discussed

Issues (Rej., Obj., etc)	Claims/ Fig. #s	Prior Art	Discussed	Agreed	Not Agreed
(1) <u>Obj.</u>	<u>IDS</u>	_____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(2) <u>Obj.</u>	<u>FIG 5B</u>	_____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(3) <u>Obj.</u>	<u>Cl. 6, 8, 25, 24</u>	_____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(4) <u>Rej.</u>	<u>Cl. 9</u>	_____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

☒ Continuation Sheet Attached

Brief Description of Arguments to be Presented:

(1) Clarify what is needed to put in compliance
(2) Propose cancellation of claims 6 & 25
(3) will advise terminal disclaimer

An interview was conducted on the above-identified application on _____.

NOTE:

This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.

5

CLAIMS

We claim:

1. A method for developing *and customizing* an application program, wherein the application program includes a user interface, wherein at least one resource data file written in a markup language is used in specifying attributes of the user interface, the markup language to be interpreted in accordance with a schema, ~~the application program using at least one resource file, the resource file including resource data in a markup language to be interpreted in accordance with a schema, wherein the resource data file may be modified by a user of the program, and wherein the resource data file does not explicitly specify all resource data needed in constructing the user interface, the method comprising the steps of:~~
- parsing the resource data file;*
- constructing a data tree wherein a node in the tree corresponds to an attribute tag in the resource data file;*
- traversing the tree to determine whether an attribute tag node does not contain specific data needed in constructing the user interface; and*
- identifying a first resource element data needed for the first resource element;*
- identifying specified data for the first resource element in the resource file;*
- and
- obtaining missing non-specified resource data, which is not explicitly specified for the first resource element in the resource file, from one of the a sources in the group consisting of:*
- resource data contained in another node in the tree;*

~~resource data for an implementation of a second resource element.~~
resource data from a default style specification in the schema,
~~resource data from a parent element of the first resource element,~~
resource data specified by the application program, and
resource data specified *by the user* in programmable settings.

5

CLAIMS

We claim:

1. A method for developing and customizing an application program,
wherein the application program includes a user interface, wherein at least one
resource data file written in a markup language is used in specifying attributes of
the user interface, the markup language to be interpreted in accordance with a
schema, wherein the resource data file may be modified by a user of the program,
and wherein the resource data file does not explicitly specify all resource data
needed in constructing the user interface, the method comprising the steps of:
parsing the resource data file;
constructing a data tree wherein a node in the tree corresponds to an
attribute tag in the resource data file;
traversing the tree to determine whether an attribute tag node does not
contain specific data needed in constructing the user interface; and
obtaining missing resource data from a source in the group consisting of:
resource data contained in another node in the tree,
resource data from a default style specification in the schema,
resource data specified by the application program, and
resource data specified by the user in programmable settings.
